Score: 73.4%

Jaycees Secondary School, Bhaktapur — *SLC*

April 2011 - May 2014

Score: 88.25%

EXPERIENCES

Backend Engineer (Jan 2023 – Present)

*Genius Systems Pvt. Ltd. – Lalitpur, Nepal

- Designed and developed backend services using **Laravel**, **Node.js**, and **Moleculer** for large-scale projects such as **NetTV (IPTV)** and **ISP OSS/CRM systems**.
- Implemented **microservices architecture** and integrated **Apache Kafka** for real-time event streaming and subscription cache management.
- Built key ISP software modules, including **CRM**, **Subscription**, **FTTH**, **Inventory**, and **AAA** modules, supporting hundreds of thousands of active customers.
- Developed APIs for IPTV launcher cache flushing, subscription cache flushing, and activity logging.
- Designed and developed a pluggable **Notification System** project in Laravel. SMS/FCM/Email OR all from a single API call.
- Integrated third-party payment services of Nepal, like Esewa, Khalti, and Fone Pay, through a custom-made ERP system and API integration.

SKILLS

- PHP, JavaScript, Python
- [Node.js](#), Laravel, MongoDB, MySQL, React.js, Vue.js.
- Git and GitHub
- Docker, CI/CD

Links

LinkedIn:

GitLab:

<https://gitlab.com/SauravDhami>

Git Hub:

<https://github.com/SauravDhami>

- Developed **social logins** features like login with google, apple, facebook and myWorldlink Login.
- Developed and managed an **IP camera** project containing features like social logins, e-payments, package subscriptions and reporting.
- Applied **CI/CD pipelines** for deployment automation, with working knowledge of **Docker** for containerization.
- Ensured secure, optimized database interactions with **MySQL**, improving system performance and reliability.
- Made optimized views and reports for business analysis.
- Took a meaningful 2-week Leadership Training by Aditi Goyal from Learn Infinity.
- Collaborated with both national and international clients/developers for joint software development process from start to end.

Software Engineer Trainee (MERN Stack Intern) (Apr 2022 – Jul 2022)

**Optimum Futurist Pvt. Ltd. – Kathmandu, Nepal*

- Built an **HR management web application** with a team, including attendance tracking, scrum meeting logs, and team-building session modules.
- Developed a **Dumpling Store**, an e-commerce platform (web), and practiced building a small **React Native** mobile app.
- Worked with **MongoDB, Express.js, React.js, and Node.js** to deliver full-stack solutions.
- Gained experience in **REST API development**, frontend-backend integration, with basic **automation testing**, and collaborative Git workflows.

Academic Project

- **Medicine Recommendation System** – Built a recommendation engine using **Python** and **Random Forest Algorithm** to suggest top medicines based on diseases or related drugs.
 - Used data from real Amazon products, analyzed comments of each medicine, and ratings by real users for medicine ranking.
 - Designed and deployed **two REST APIs (drug/disease search)** to serve results to mobile applications.

Freelancing Projects (Full Stack) with Vue + Laravel

1. Custom SMS module with Twilio for Concord CRM
